Date:	29/09/2020		
Issue No:	002	Sheet No:	1 of 1

REACH (Registration, Evaluation, Authorisation and restriction of chemicals) is a European Union Commissions regulation pertinent to the safe use of chemicals (EC1907/2006). This regulation entered into force in June 2007 and replaced a number of EU directives and regulations, merging them into a single system. The purpose of this regulation is to ensure sufficient levels of protection for human health and the environment. The regulation imposes controls that identify, assess and allow businesses to manage chemical substances.

AT Engine Controls will comply with these regulations as listed below:-

- ATEC site compliance against REACH candidate list
- Where applicable receive and assess REACH information from our suppliers
- Periodic assessment and evaluation of our supply chain to ensure compliance
- Produce and distribute this policy of compliance to our supply chain
- Monitor the candidate list as part of the ATEC oversight and compliance requirements
- Periodic review and auditing of our REACH compliance programme

For clarity ATEC products are released as “articles” as defined within REACH regulation 3 (3) and do not release substances as described for normal use. All ATEC employees are committed to comply with all REACH obligations and regulations regarding the transfer of information within the supply chain. Should any further information or clarification be required you should contact the ATEC purchasing department.
